

Tom Spalding, Chief Fly Guy from Spalding Labs

"If your horses could talk they'd likely tell you that flies are a nasty nuisance that make them MISERABLE! As if you didn't know. You can spray gallons of pesticide, hang dozens of stinky traps, put up acres of sticky strips and yet the flies just keep coming back. Many figure they just have to put up with flies. But you don't. You can say Bye Bye Flies this summer." *Tom Spalding*

Tom Spalding, the "Chief Fly Guy" from Spalding Laboratories will be joining us for the March General Meeting to share about the effectiveness of fly predators. Now is the time to prepare to fight the flies that are sure to come as the weather heats up. Tom will share with us just how fly predators can help. So, join us at the Empty Saddle Club on Thursday March 20 at 7pm.

If you are, "Tired of endlessly spraying your horses with pesticides (and yourself while you're at it) or concerned about feed through larvicides? Then go biological."
